

## SAFE. SIMPLE. RESPONSIBLE.

SAFE SHARPS provides a simple, compliant, and sustainable solution for sharps disposal: protecting employees, customers, and communities while supporting your company's commitment to safety and environmental responsibility.

### WHAT IS SAFESHARPS

SAFE SHARPS is a cost-efficient, DOT- and USPS-certified **all-in-one sharps disposal mail-back solution** that combines an easy-to-install, rugged, lockable, tamper-resistant wall-mounted sharps enclosure with **end-to-end tracking and disposal documentation** for effortless compliance with federal, state, USPS, and DOT regulations.

### HOW IT WORKS

**Choose your SafeSharps container size: 1-quart or 5-quart**

**Choose refill frequency: every 3, 6, or 12 months**

**Mount the SafeSharps wall box in each restroom**

**When your refill kit arrives, swap containers and mail the used one back in the prepaid, pre-addressed box**

### LEADING WITH HEALTH, SAFETY & SUSTAINABILITY

The use of self-injected medications is rapidly growing, but safe disposal options haven't kept pace. More than **9 million Americans give themselves over 3 billion injections a year** outside healthcare settings, and that number is expected to **more than double by 2030**.

SAFE SHARPS helps close that gap, providing a safe, convenient way to dispose of sharps while showing everyone who walks through your doors that you put health, safety, and sustainability first.

**Compliance-ready service starting at *\$6/month per restroom\** with a 3-year subscription.**

\*based on 1Q container with annual refill
